

Allianz Motor Insurance OpenAPI — CheckUBB Issue Report

Date: 22 July 2026

Partner: DC AUTO SERVICES (HALLU)

Partner ID / SourceSystem: DCAUTO

1. Issue Summary

The `/v1/openapi/mci/checkUBB` endpoint returns **"Invalid Agent Code"** when called with **SourceSystem: "DCAUTO"** (as confirmed by Allianz team). This prevents us from completing the UBB Check 2 step before quote generation.

2. Request Details

Field	Value
Endpoint	POST /v1/openapi/mci/checkUBB
Environment	UAT (asia-uat-malaysia.apis.allianz.com)
SourceSystem	DCAUTO
CheckUbbInd	2
ProductCat	MPC
X-Request-ID	ff9b9820-f44c-4b24-b605-1420fc4d0570
Tested On	21 July 2026, 9:09 PM (UTC+8)

3. Full Request Payload (JSON)

```
{
  "ReferenceNo": "CNAZ00005135846",
  "ProductCat": "MPC",
  "SourceSystem": "DCAUTO",

          "SumInsured": "35600.00"
        }
      }
    ]
  }
}

```

4. Response Received

```

{
  "Status": 500,
  "Error": "Invalid Agent Code"
}

```

5. Additional Notes

- SourceSystem has been set to **DCAUTO** as confirmed by Allianz team.
- The same error occurs regardless of whether SourceSystem is DCAUTO or PTR.
- All other endpoints (vehicleDetails, generateQuote, updateQuote, submission) work correctly with the same Partner ID.
- UBB Check 1 (via vehicleDetails with checkUbbInd:1) also works without issues.
- Only CheckUBB endpoint (Ind 2) returns this error.

6. UAT Callback URL

Please configure the following callback URL on your end for UAT:

Field	Value
Callback URL	http://gentle-emerald-armadillo.103-10-78-80.cpanel.site/pj-insurance/api/callback
Method	POST
Content-Type	application/json
Expected Response	{ "received": true, "timestamp": "..." }

Please also confirm:

- The HMAC secret/key for signature verification
- The header name used for the HMAC signature (e.g., X-Allianz-Signature)
- The callback payload structure (fields included in the POST body)

7. Action Requested

- **CheckUBB:** Investigate the "Invalid Agent Code" error for Partner ID DCAUTO in UAT.
- **Callback:** Configure the UAT callback URL above and share the HMAC secret and payload structure.
